sedjrotovihouande.com · github.com/Tovi91-hub

Software Developer · Cloud Computing Professional · U.S. Army NCO

Full-stack software developer and active-duty U.S. Army Sergeant with a B.S. in Information Technology (Software Development, **magna cum laude**) and four production web platforms designed, built, and operated end to end — a multi-tenant healthcare SaaS, an AI-powered financial-readiness platform for the military community, a small-business commerce platform, and a mobile-first insurance product. Security-first engineer: multi-tenant data isolation, role-based access control, audit trails. NCO leadership with accountability for people, \$3M in equipment, and mission outcomes.

## TECHNICAL SKILLS

|                |                                                                                                       |
|----------------|-------------------------------------------------------------------------------------------------------|
| Languages      | TypeScript, JavaScript, PHP, SQL, HTML5, CSS3                                                         |
| Frontend       | React, Next.js (App Router), Tailwind CSS, responsive & accessible UI (WCAG)                          |
| Backend & Data | Node.js, REST APIs, MySQL, SQL Server, relational modeling, multi-tenant schemas                      |
| Cloud & Tools  | Vercel, Git/GitHub, DNS & custom domains, automated testing (Vitest, PHPUnit), VS Code                |
| Integrations   | Stripe & Stripe Connect, transactional email (Resend, PHPMailer), mobile-money payment flows          |
| Security       | RBAC, tenant isolation, audit logging, secure auth & sessions, input validation, security headers/CSP |

## PRODUCTION SOFTWARE — FOUNDER & SOLE DEVELOPER

### MyVital Harmony · Multi-tenant healthcare & wellness SaaS

myvitalharmony.com · Live

- Built a multi-tenant platform where each business runs under its own brand with database-level tenant isolation, role-based access (owners, providers, staff, clients), and append-only audit trails.
- Integrated Stripe subscriptions for platform billing and Stripe Connect for per-business payouts; shipped scheduling, secure client messaging, and digital programs on tiered plans (\$19–\$129/mo).
- Engineered for regulated work: encrypted health-data vault separated from operational data.

### MyFreedomOps · AI financial readiness + personnel accountability

myfreedomops.com · Live

- Built an AI-guided platform for the military community covering debt elimination, emergency savings, and credit — plus an accountability module giving unit leaders first-formation status roll-ups from Soldiers' self-reports. Independently developed; not affiliated with the U.S. Army or DoD.

### Murielle Hair Braids · Small-business booking & e-commerce

muriellehairbraids.com · Live client production

- Delivered a client's full digital storefront — service catalog with transparent pricing, online booking with deposits, product shop, admin dashboard, and local SEO — processing real bookings and payments.

### Sedoinurance · Mobile-first insurance platform (Benin)

sedoinurance.com · Live

- Built a bilingual (FR/EN) insurance platform — online quoting across four product lines, mobile-money payments, and phone-first claims — with policies issued through licensed partner insurers.

## MILITARY EXPERIENCE

### Sergeant (92F) — United States Army, Active Duty

JBER, Alaska · 2020 – Present

- Lead, train, and develop Soldiers; accountable for personnel readiness and \$3M in petroleum assets with zero-loss accountability.
- Unit Prevention Leader and Hazmat certifier — own compliance-grade documentation for hazardous-materials logistics and ammunition transport.
- Supported S2 (security) office IT operations: access control, SAAR processing, and secure documentation workflows.

## EDUCATION

**B.S. in Information Technology — Software Development Using Web Languages · Magna Cum Laude** Purdue University Global · April 2026

**Vocational Bachelor's — Electrical Engineering & Industrial Data Processing · Upper Second-Class Honours** IUT Lokossa, Univ. of Abomey-Calavi (Benin) · 2013

- NACES-evaluated U.S. equivalency (SpanTran): 91.5 semester credits, 3.73/4.00 GPA — coursework incl. OOP, databases, computer architecture, Linux/Windows network administration.

## CERTIFICATIONS & MILITARY SCHOOLS

U.S. Army Airborne School · Hazmat Certifier · Unit Prevention Leader · Security Management (S2) · CompTIA Security+ (in progress) · Languages: English & French (professional)
