

SEDJRO M. TOVIHOUANDE

FULL-STACK ENGINEER | CLOUD & AWS

Fort Irwin, CA | 970-702-5982 | mathoss.221091@gmail.com | sedjrotovihouande.com

linkedin.com/in/sedjrotovihouande | github.com/Tovi91-hub

PROFESSIONAL SUMMARY

Full-stack engineer who builds production web platforms from architecture through deployment and support. Hands-on with React, Next.js, Node.js, NestJS, PostgreSQL, and AWS serverless infrastructure, including CI/CD, authentication, payments, DNS, and production troubleshooting. Five platforms live, several handling real bookings and customer workflows. B.S. in Information Technology, completing an M.S. in cloud technologies, while serving as a U.S. Army NCO.

CORE TECHNICAL SKILLS

Languages & Frontend: TypeScript, JavaScript, SQL | React, Next.js, Tailwind CSS, responsive UI

AWS & Infrastructure: CDK, Lambda, API Gateway, S3, CloudFront, ACM, Secrets Manager, CloudWatch

Backend & Data: Node.js, NestJS, REST APIs, JWT/Passport auth, RBAC | PostgreSQL, Supabase

DevOps & Integrations: GitHub Actions, IaC, secrets management, Cloudflare DNS | Stripe, FedaPay, SMS

PROFESSIONAL EXPERIENCE

Sedjro Digital LLC — Founder & Full-Stack Engineer

Aug 2026 – Present

Remote | Independent software studio serving small businesses

- Design and deliver end-to-end web platforms with online booking, deposits, payment processing, administrative dashboards, and mobile-first interfaces.
- Launched muriellehairbraids.com as a production booking platform supporting live appointments and customer payments.
- Own requirements, architecture, development, deployment, DNS and email configuration, and ongoing production support.

U.S. Army — Petroleum Supply Specialist (92F), Noncommissioned Officer

Mar 2020 – Present

HHT, 1st Squadron, 11th Armored Cavalry Regiment | Fort Irwin, CA

- Instruct the FMTV Cargo Operator Course, training and certifying Soldiers on vehicle operation and safety standards.
- Serve as Troop Master Driver, maintaining licensing and qualification records and supporting unit readiness. Active Secret security clearance.

SELECTED ENGINEERING PROJECTS

FreedomOps — myfreedomops.com

Next.js | NestJS | AWS CDK

- Architected a full-stack financial operations application using AWS CDK, with a Next.js static frontend on S3/CloudFront and a NestJS API on Lambda behind API Gateway.
- Implemented JWT/Passport authentication, Secrets Manager, ACM, Cloudflare DNS, and GitHub Actions CI/CD; resolved Lambda cold-start dependency failures through CloudWatch diagnostics.

Sedo Insurance — multi-product insurance platform

Next.js | Tailwind | Supabase

- Built a monorepo platform for the West African CIMA market with a public marketing site, authenticated customer dashboard, shared design system, and full French/English internationalization.

MyVital Harmony & EUVB Platform

Next.js | Railway

- Developed role-based clinic and community platforms with appointment scheduling, member authentication, FedaPay payments, SMS confirmations, and transactional email workflows.
